oh, baby!

From the local company that brought us Juice So Good comes **So Good Baby**. Made from only whole, organic, real fruits and vegetables with no preservatives or added ingredients, So Good Baby is processed using the same new technology as original Juice So Good. High-Pressure Processing (HPP) maintains quality and freshness and ensures that ingredients retain their nutrients better than baby food processed with heat. These fresh, perishable baby food pouches have a clear window on each pouch, so moms and dads can feel good about what's inside. Find So Good Baby and all So Good So You products in the Produce Department.
